Perfected ceramic surfaces

A perfect finish – lifelong.

Ceramic sanitary ware from LAUFEN is characterised by its utmost quality.

This applies for the products' functionality, longevity and design.

The use of innovative materials and technologies means that LAUFEN products offer you perfect and extremely resistant ceramic surfaces that are easy to care for. Whether in private bathrooms or public buildings: you are always on the safe side with LAUFEN.

Discover the easy way to clean.

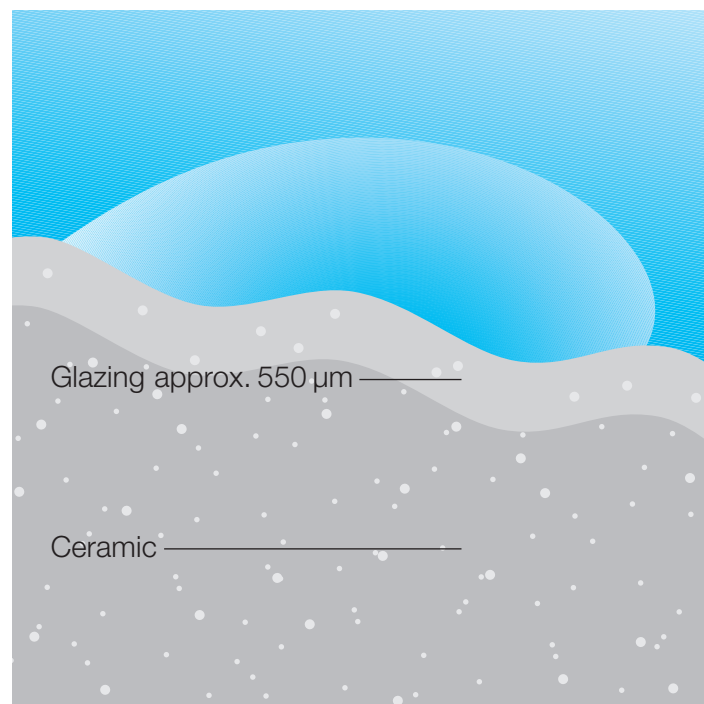

Solid Base

Solid Base: the ceramic surface from LAUFEN you can rely on.

The "standard" ceramic surface from LAUFEN – which is anything but standard! Selected raw materials and the use of state-of-the-art production technologies ensure the absolute top quality and longevity of Solid Base ceramic surfaces. Dirt-repellent, easy to care for, and with a resistant surface, they are always more than a match for everyday conditions.

Ceramic sanitary ware from LAUFEN has a smooth, extremely dense and scratch-resistant surface. Solid Base gives users the assurance that cleaning and care can be carried out in no time. Even after years of use, the ceramic surface retains its finish – a perfect reflection of LAUFEN's quality philosophy.

Microscopic sectional view

Special properties of Solid Base

- Dirt-repellent
- Easy to clean
- Resistant surface
- Hygienic surface
- Smooth surface
- Longevity, durable

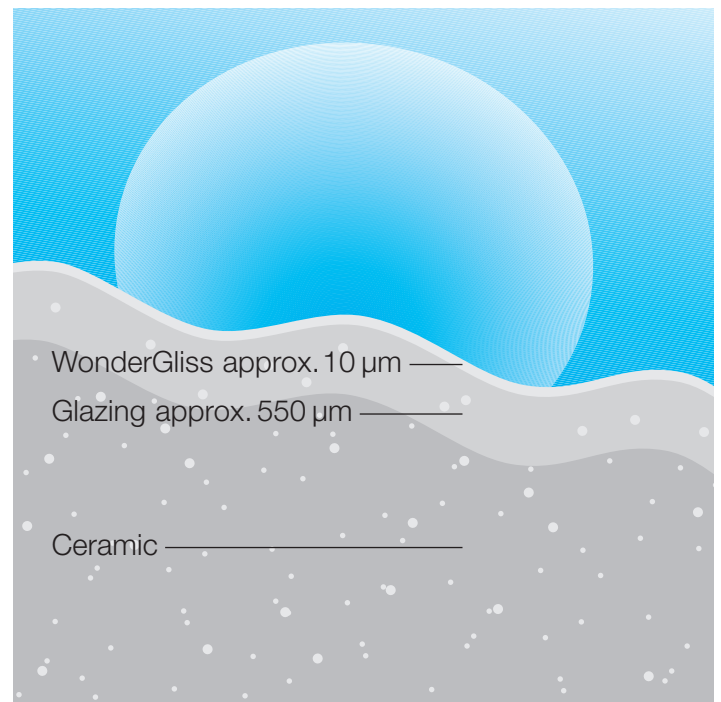

WonderGliss

WonderGliss: the ceramic surface from LAUFEN that makes life considerably easier.

WonderGliss makes the care and cleaning of ceramic sanitary ware from LAUFEN mere child's play. This is because neither dirt nor lime deposits gain a grip on the particularly smooth surface – they simply roll off with the water! And where there is less dirt and deposits, less cleaning is required.

WonderGliss ceramic from LAUFEN is characterised by small nanoparticles that have been inserted into the atomic structure of the ceramic. This creates a smooth surface that is extremely dirt-repellent. Moreover, WonderGliss is burned-in – so the ceramic retains its smooth brilliance for a particularly long time.

Special properties of WonderGliss

- Dirt-repellent
- Very easy to clean
- Water roll off effect
- Resistant surface
- Hygienic surface
- Smooth surface

LAUFEN Clean Coat

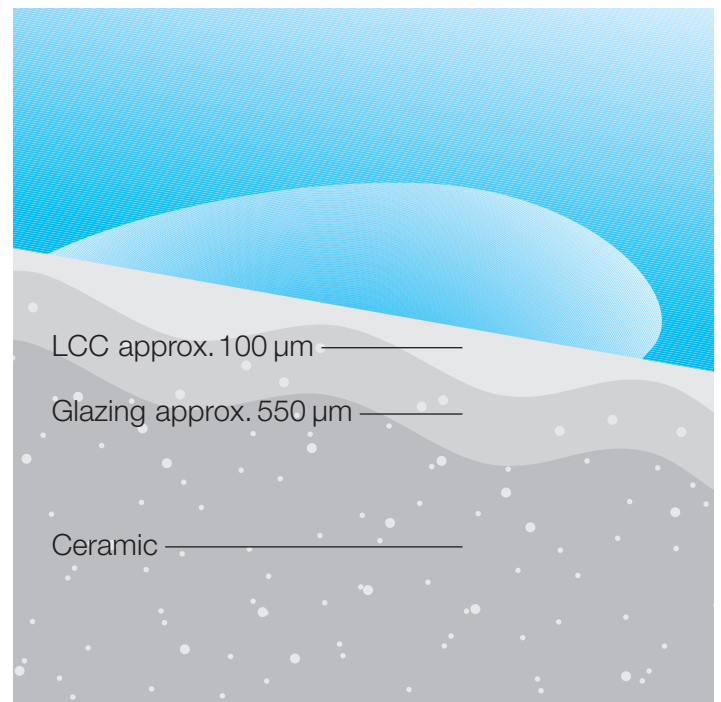

LCC
LAUFEN CLEAN COAT

LCC from LAUFEN: the new high-tech formula for maximum hygiene and cleanliness.

LCC from LAUFEN is one of the most innovative ceramic surfaces in existence. It is almost completely free of pores and so smooth that drops of water simply flow away like oils. As the absolutely smooth surface offers almost no grip, the water can simply wash dirt particles and bacteria away. What remains is a hygienically pure, clean surface. LCC is thus also ideally suited for the use in public buildings, e.g. in often-frequented bathrooms. LCC is resistant to aggressive detergents, extremely low-abrasion, and offers the advantage of low cleaning and maintenance costs.

With LCC from LAUFEN, the ceramics are always in top condition. The glazing is directly melted into the ceramics in a special innovative and elaborate process – thus making it extremely hard and scuffproof. With LCC, the entire glazed surface is covered; achieving a „glazing within a glazing“ effect. For complete hygienic cleanliness throughout.

Special features of LAUFEN Clean Coat

- Dirt-repellent
- Easy to clean
- Resistant surface
- Hygienic surface
- Very smooth surface
- Longevity, durable

Advantages that
are anything but
superficial.
For durable ceramics.

Solid Base

WonderGliss 

LAUFEN Clean Coat 

LAUFEN offers perfect ceramic surfaces for every area of use and every conceivable requirement. They are characterised by their consistent quality philosophy, are extremely durable, and meet practically all demands. Good to know that LAUFEN is always the best choice. With innovative technologies that guarantee real added value.

The advantages at a glance:

	Solid Base	WonderGliss	LAUFEN Clean Coat
Dirt-repellent	+	++	+
Easy to clean	+	++	+
Water roll off effect	+	++	+
Resistant surface	++	+	++
Hygienic surface	+	+	++
Very smooth surface	+	+	++
Longevity, durable	++	+	++

Caring for LAUFEN ceramics

Please read the manufacturer's caring instructions thoroughly. If in doubt, you can test your cleaning agent on a non-visible spot.

You should avoid using highly aggressive detergents that may scratch the ceramic surface and impair the unique properties of our products or, if used over a prolonged period, may even destroy them; e.g.:

- Scouring powder or scouring liquids
- Highly concentrated drain cleaners
- Cleaners for fittings and steel
- Powdered WC Cleaners

We recommend avoiding such cleaning agents completely, or at least avoid any direct contact with the ceramic surfaces when using drain cleaners or cleaners for fittings and steel.

Your advantage: thanks to the exceptional easy-care properties of WonderGliss and LCC, no aggressive cleaning agents are required for fresh cleanliness and optimum hygiene.

Please consult your local dealer or plumber for the guarantee terms.

Select the surface that meets your needs from the range of ceramic sanitary wares from LAUFEN.
